U.S. ARMORY CORPS

DEFENSE ARTICLE PROCUREMENT
SECURITY • INTELLIGENCE • LOGISTICS

U.S. ARMORY CORPS provides the importation, manufacturing and brokerage of munitions, weapons and other defense articles domestically and abroad. U.S. Armory Corps was established in 2009 in order to harness the relationships in which its executive partners have cultivated both domestically and abroad. These relationships allow us to provide unique support for intelligence, logistics and other security services around the globe.

IMPORT, EXPORT & PROCUREMENT

U.S. Armory Corps maintains the ability to procure NATO Standard and Non-Standard (Warsaw Pact) defense articles currently in production, along with all former Soviet defense articles where surplus and new production continues to exist.

U.S. Armory Corps supplies both foreign and domestic government agencies along with civilian markets the defense articles which are imported, exported, brokered and manufactured by U.S. Armory Corps. Through its partnerships and federal licensing, U.S. Armory Corps procures NATO Standard and Non-Standard defense articles from domestic manufactures as well as foreign NATO partners and former Soviet era countries. All items can be exported or brokered upon approval of the DDTC, Department of State Program where applicable laws and regulations require.

U.S. civilian sales are serviced through our subsidiary, USAC Sales, LLC.

FOREIGN CONFLICTS

Pending the DDTC approval and pre-approval process (where applicable) U.S. Armory Corps can supply the required defense articles and support to foreign conflict zones to both State controlled Governments and approved contractors alike. Within many regions, along with defense articles, U.S. Armory Corps can provided logistics, security personnel, intelligence and other security services through our established partnerships and relationships.

MANUFACTURING

Along with our capabilities of munitions import and export, U.S. Armory Corps maintains a fully licensed manufacturing facility for both the production and service of weapons and ammunition.

LOGISTICS

U.S. Armory Corps has developed an extended logistics partnering network which allows us to place our client's defense articles securely and reliably in the majority of countries around the world. Along with defense articles, U.S. Amory Corps can provide logistics and secured transportation for personnel and their equipment in hostile environments.

MILITARY AND SECURITY TRAINING

U.S. Armory Corps offers military and security training (basic through special operations), executive protection, trauma and medical training, along with a wide range of other services provided by Tier 1 operators and other former U.S. and foreign elite military personnel.
